DETAILED ACTION

Allowable Subject Matter

Claims 1, 12, and 24 are allowed. The following is an examiner's statement of reasons for allowance: U.S. PGPub 2002/0064354 to Ware teaches the base plate, the sliding jib upon the base plate, the stripper, and the cleaver. Ware also teaches that the cleaver (cleaving station 103) may cleave optical fibers in multiple steps and may include any type of optical fiber cleaving device. Ware does not teach the cleaving station to have a gripper, a cutting wheel, and a compression block. U.S. Patent 5,501,385 to Halpin teaches an optical fiber cleaver having a fiber connector block 103 (the gripper) that holds the fiber before and after cleaving, a scribe assembly 120 (the cutting wheel) that may have a scribing wheel 162 (Column 8) to be drawn perpendicularly across the optical fiber to make a scribed line (or a cleaved line), and a chuck assembly 112 (the compression block) that has an internal compression spring. However, Halpin teaches the optical fiber cleavage by tension (the fiber is pulled apart by the spring at the cleaved line) and not compression as claimed by the Applicants. The examiner finds no obvious reasons for one having ordinary skill in the art at the time the invention was made to combine and modify Ware and Halpin in order to arrive at the present application. It is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious in combination with the rest of the limitations of the claims.

Claims 2-4, 6-11, 13-16, 18-23, 25-29, and 31-36 are allowed by virtue of being dependent on allowed claims.
